Enjoy safe driving with a clear vision!

Have you checked your wiper blades recently?

When the wipers wear out, they are unable to wipe away the water and dirt sufficiently, which causes low visibility on rainy days.

[Useful tips on wiper blades]

Wipers are actually not wiping off the water drops, but creating a thin even film of water to prevent refraction on the surface of the windscreen. The structure and mechanism itself has not changed much since it was invented over a hundred years ago, but it requires exquisite designing to secure clear vision from inside the car. Take a look at the wipers and you will realize that they are made in detail. Suzuki genuine wipers are designed specifically for each model so it will fit your Suzuki perfectly. Be sure to change your wiper blades regularly to maintain optimal visibility.

Purpose and Function

Wipers remove raindrops and debris from the windscreen on rainy days, and play a very important role in keeping your vision clear. Damaged or deteriorated wipers cannot clean your windscreen effectively, so it is very dangerous to drive your car. Be sure to change your wiper blades regularly to maintain optimal visibility.
