Suzuki Unveils New Large Outboard Motor DF325A at the Düsseldorf Boat Show

DF325A

Suzuki Motor Corporation has unveiled new large outboard motor DF325A at the Düsseldorf International Boat Show which is being held in Düsseldorf, Germany from 20 to 28 January, 2018.

DF325A adopts state-of-the-art technologies including the contra-rotating propellers, which are in common to the DF350A flagship outboard motor. It realises excellent output performance with maximum output of 325PS, while meeting wide range of usage with the use of regular petrol* as its fuel. By introducing a high output model that can be used with regular petrol, which is a more common fuel compared to premium petrol, it can be offered to customers in many more countries and regions.

*Octane number of 91 or more.

DF325A will be produced in Japan, and is scheduled to be distributed globally from the spring of 2018 in areas including Asia and Latin America, subsequently followed by Europe, Japan, and other countries and areas.

A total of 30 outboard motors ranging from DF2.5 to DF350A are exhibited at the Düsseldorf Boat Show.

<Main features of DF325A>

- Compact, 4,390cm³ four-stroke V6-cylinder engine that boasts maximum output of 325PS with regular petrol.
- Suzuki's unique contra-rotating propellers, Suzuki Dual Prop System.
- Sporty, aggressive, and innovative styling.
