

## Overview of Exhibits at the JAPAN MOBILITY SHOW BIZWEEK 2024

Suzuki Motor Corporation will make the following exhibition at the JAPAN MOBILITY SHOW BIZWEEK 2024 (organized by the Japan Automobile Manufacturers Association), which will be held at the Makuhari Messe from 15 October to 18 October 2024.

JAPAN MOBILITY SHOW BIZWEEK 2024 will be held as a business event where startups and business companies join forces to create new businesses.

At the Suzuki booth, we will call for ideas from startup companies on how to utilize the fuel cell that Suzuki is developing, as well as accept applications of demonstrators and collaborative partners based on the themes of SUZU-RIDE and SUZU-CARGO.

Suzuki aims to develop new business fields and further promote “Realization of a society where everyone, from the young to the elderly, can move with peace of mind and have no difficulty in getting around” in cooperation with startups and operating companies.

### Main Exhibits and Application Details

#### <Reference Exhibit>

#### Hydrogen Fuel Cell (FC) Cargo Dolly

- Application development and business ideas specialized in specific usage of fuel cells developed by Suzuki
- Technologies and solutions to improve the energy conversion efficiency of fuel cells
- Energy management systems to optimize overall fuel cell system efficiency
- New materials and manufacturing processes to reduce fuel cell manufacturing costs and man-hours
- Auxiliaries to realize “Smaller, Fewer, Lighter, Shorter, Beauty”, etc.

#### <Reference Exhibit>

#### SUZU-RIDE / SUZU-CARGO, electric personal/multi-use mobility

- Demonstrators and collaborative partners using new mobility
- Technologies and services to prevent and prepare for accidents
