Pak Suzuki Motor Starts Operation of Biogas Plant and Solar Power Generation Facilities

Pak Suzuki Motor Company Limited (“Pak Suzuki”), a subsidiary of Suzuki Motor Corporation (“Suzuki”) in Pakistan, has introduced a biogas plant with a capacity of 100 cubic meters per day and a solar power generation system with an output capacity of 920 kW at its manufacturing plant, and both facilities have commenced operation.

The biogas plant and solar power generation facilities form part of Pak Suzuki’s initiatives toward carbon neutrality. The biogas plant makes use of Napier grass, widely available in Pakistan, along with waste from company cafeterias.

Suzuki will continue to contribute to the realization of a sustainable society by promoting environmental initiatives tailored to the specific conditions of each region, including Pakistan.

● **Comments from Hiroshi Kawamura, Managing Director, Pak Suzuki Motor Company Limited**

“The commissioning of our biogas plant and solar power facility demonstrates our commitment to integrate clean energy into our operations and contribute meaningfully to Pakistan’s environmental priorities. We remain committed to adopting environment-friendly manufacturing practices and will continue to invest in technologies that support a greener future.”

● **Overview of the Facilities**

Biogas Plant	
Location	Pak Suzuki Plant, Karachi, Islamic Republic of Pakistan
Area	360m ²
Capacity	100m ³ /day
Solar Power Generation Facility	
Location	Pak Suzuki Plant, Karachi, Islamic Republic of Pakistan
Area	6,310m ²
Output Capacity	920kW
Annual Power Generation	1,395,000kWh
